

Director of Technology Transfer

Bob Lewis

204 Amundson Hall

(612) 625-1269

boblewis@umn.edu

A graduate of the University of Wisconsin-Madison, with an M.S. MOT (Management of Technology) from the University of Minnesota, Bob has extensive experience in industries central to many IPrime companies.

He has over 20 years of industrial, technical, and management experience from Bostik Findley (then Atofina) and Brady Corporation, where he focused on new product development and applied research in polymers, adhesives, coatings, films and printing systems.

Having made decisions regarding strategic R&D in industry, Bob can bring a unique perspective to your discussions about managing R&D portfolios and product pipelines as well as balancing long- and short-term and internal and external R&D.

Bob is responsible for building solid connections with member companies to facilitate research collaborations with the University of Minnesota.
